

**THE METAL  
MANUFACTURING  
EXPERT**

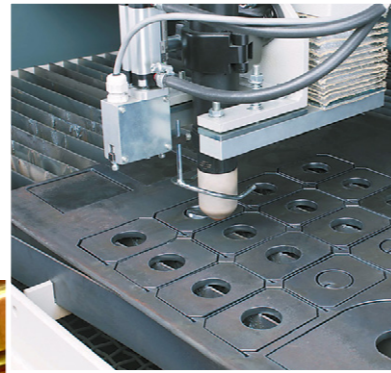

Pressform Engineering has almost 50 years experience in providing reliable specialist metal fabrication and manufacturing services for industrial, mining, oil & gas, commercial and residential building projects world wide, including some of Australia's largest companies.

## YOUR ONE STOP METAL MANUFACTURING SHOP.

We provide a total component solution from the smallest custom part to complex, welded structures up to 10 tonnes. We offer all forms of CNC machining, punching, pressing, bending, rolling, laser & high definition plasma cutting, robot welding and general fabrication and we work consistently in all metals including stainless, nickel alloys, aluminium, copper, brass, carbon steels, quench and tempered steels. We design, build and maintain all our tooling in our own factory which ensures our products are high quality and cost effective.

There are many ways to manufacture a product. With Pressform, you no longer have to worry whether you have the best manufacturing process for your job. Pressform can do it all, saving you time and money.

PRESS • FORM  
PLASMA • LASER  
WELD • PUNCH  
CUT • MACHINE

## MANUFACTURING EXPERTISE FOR THESE INDUSTRIES:

- Automotive
- Mining, Oil & Gas
- Building & Architectural
- Agricultural
- Chemical
- Water Supply Infrastructure
- Refractory
- Pipe Support Industry
- Renewables
- Safety

## NEED A NEW PRODUCT? WE'LL FIND THE MANUFACTURING SOLUTION.

Our experienced team specialises in providing innovative engineering solutions for new products and will work out the most efficient manufacturing method to deliver your product on time and on budget. We have in-house design capabilities and a qualified Metallurgist on staff. Custom made parts can be improved and produced in any quantities to your requirements, with a fast turnaround.

Pressform can manufacture any component small or large, from washers, pipe supports, machined and threaded components, production welded brackets, clamps and pipe supports, handrails and lintels to motor vehicle parts and valve components.

## PRE-FABRICATED PARTS FOR INDUSTRY.

Pressform also designs and manufactures an extensive range of pre-fabricated parts for industry including: transport, body building and rail components, refractory hardware, pipe supports, mining spares and valve lubrication fittings.

Whatever your fabrication requirement, Pressform is your one-stop metal engineering shop you can trust to deliver guaranteed on time, cost effective metal manufacturing with unmatched quality.

## CAPABILITIES

- Hydraulic Powered **Press 630 tonne** with deep draw die cushion capacity
- CNC **Turret Press** – 30 tonne
- CNC **Plasma** Cutting with nesting software
- 3Kw & 6Kw **Fibre Laser** Cutting Machines cutting up to 25mm thick
- **Press Brake 400 tonne x 4000mm long**  
Press Brake 150 tonne x 3600mm long
- Automatic scissor style Bandsaw with feed table and full capacity hydraulic overhead bundling
- Punching 0.5mm to 20mm thick
- **Bending** 2.5 to 150 tonne, fast mechanical and metered hydraulic
- Cropping 250mm x 10mm, 75mm x 20mm
- Forming & deep drawing
- CNC Plate **Rolling** 10mm x 1800mm wide to 32mm x 75mm, including cone sections
- Complete Welding (GMAW, GTAW, MMAW, SAW) and **fabrication** capabilities
- **Robot Welding System** with 2000mm arm reach for stainless & mild steel welds
- **Stud Welding:** Including Stud Production and Testing
- CNC Milling: **Machining** Centres
- **CNC Turning:** Bar Feed **Lathes** (72mm max for bar feed)
- Tool Making and General Machining (Milling, Surface Grinding, Turning, Drilling and Threading)
- Painting: Electro Static Painting capabilities (2 pack, Enamel)
- Dual Head Semi-Automatic Welding capabilities
- Lifting Capacity 10 tonnes overhead cranes
- Post production finishing services: Sand Blasting, **Rumbling**, Painting, Powder-coating, Galvanising, Anodising, Electroless Nickel, Zinc or Chrome Plated.

## METALS + METALLURGIST

No one knows metal like we do. We have a highly experienced in-house Metallurgist, so we work confidently and consistently with all materials including austenitic & ferritic stainless steel alloys, nickel alloys, copper, brass, aluminium and carbon steels (including forming, high tensile & boiler grade).
